EDUCATION

Institute of Engineering and Technology

B.Tech - Computer Science and Engineering

2023 – 2027

Indore, Madhya Pradesh

COURSEWORK / SKILLS

• Data Structures • OOP • Computer Networks • Software Engineering • DBMS • Operating System

PROJECTS

[HireHub](#) | ReactJS, Node.js, Express.js, MongoDB, Clerk Auth, Sentry

- Built a full-stack job portal enabling recruiters to post jobs and applicants to apply through a role-based dashboard.
- Implemented secure authentication and role-based access using Clerk Auth.
- Developed responsive frontend interfaces using React and Tailwind CSS with search, filtering, and pagination.
- Designed backend APIs for job posting, application tracking, and candidate status management.
- Integrated resume upload workflows and persistent application status tracking.
- Deployed the application on Vercel and integrated Sentry for real-time error monitoring and performance tracking.
- Leveraged AI-assisted development tools for debugging, API integration, and rapid prototyping.

[Doze&Dine](#) | HTML, CSS, JavaScript, Node.js, ExpressJS, MongoDB, REST APIs

- Doze&Dine is a website where people can book unique accommodations and experiences around the world.
- Connects travellers with hosts offering varied stays and local activities with flexible options.
- I have built this website from very scratch and gained a lot of knowledge and experience while developing it. Implemented REST APIs using Express to manage bookings and MongoDB for real-time updates.
- Added filters, authentication, authorization, CRUD, middlewares, and error handling.

[SUVIDHA — Smart Civic Service Kiosk Interface](#)

Group Project — C-DAC Smart City Hackathon — PERN Stack

- Built a multilingual touch-based kiosk providing unified access to electricity, gas, water, and municipal services.
- Implemented SUVIDHA ID / QR OTP authentication with smart document reuse to reduce redundant submissions.
- Integrated voice assistant support for login, bill payment, and navigation improving accessibility for specially abled and elderly users.
- Developed responsive UI, mock payment system, receipt generation, and admin monitoring aligned with Smart City initiatives.

TECHNICAL SKILLS

Languages: C++, JAVA, JavaScript, Python, SQL

Technologies/Frameworks: HTML5, CSS3, JavaScript, React, MongoDB, Express.js, Node.js, Tailwind CSS

Developer & AI Tools: Git, Github, Docker, VS Code, ChatGPT, GitHub Copilot, Cursor

Databases: MongoDB, MySQL, PostgreSQL

CERTIFICATIONS

- Full Stack Web Development - [Internshala](#)
- Introduction to Generative AI — [Google Cloud Skills Boost](#)

EXTRACURRICULAR

- Selected for the Final Round of C-DAC Smart City Hackathon.
- Selected for final round in Smart India Hackathon (SIH).
